SYSTEM REQUIREMENTS

- e-Domotica eCentre

Find out how much power your home appliances are using with the Eminent EM6542 e-Domotica Plug-In Switch With Power Metering. Simply plug in your device and check the watts used on the e-Centre. Both EM6542 and the e-Centre are part of the Eminent home automation e-Domotica family.

Switch devices on and off
Enjoy the luxury of switching on your lights using the e-Centre control panel, manually or using a scenario on a preset time. Or use the EM6511 Remote control to switch on your lights while relaxing on the couch!
Simply control your lights through walls and ceilings. The status led on the EM6542 shows if the switch is on or off.

Monitor energy consumption
Want to know how much power your home appliances are using? Use the EM6542 to measure the watts used of common devices in your house. You can monitor the power consumption on the eCentre. The EM6542 e-Domotica Switch is a great solution on your energy consumption and money saving: just push one button to switch off all devices and "kill" all standby power.

Great wireless range
The EM6542 e-Domotica Switch is equipped with wireless technology. This technology is very reliable and offers great wireless range due the repeater function. This means that this Eminent e-Domotica device also works as an extender so you can maximize the range.
